PROFESSIONAL EXPERIENCE

Business Analytics Intern - MERCOR (CODEFEAST)

07/2025 - 11/2025

- Ran exploratory and diagnostic analyses and translated findings into weekly KPI dashboards and stakeholder slide decks to support product and growth decisions.
- Built and maintained ETL/SQL datasets and scheduled queries to automate weekly performance reporting and reduce manual effort.
- Scoped analytics requests with product, engineering, and marketing teams; prioritized dashboards and automation tasks for measurable business impact.

Sales Associate / Data Analyst - ALGOBULLS

11/2024 - 04/2025

- Managed end-to-end sales cycle for analytics/product solutions; onboarded 4 paying clients and collected INR 100,000 in one month.
- Converted 60-70% of interested prospects by tailoring demos, pricing, and proposals to client requirements.
- Built full-stack demo prototypes to showcase workflows and shorten the sales cycle.
- Performed market and competitor analysis to refine positioning and produce targeted proposals and pitch decks.

Database Management Intern - TUTORATTI.AI

09/2024 - 11/2024

- Conducted Tableau training for students and internal users to increase dashboard adoption and self-service reporting.
- Built and maintained SQL queries and data extracts for reporting and dashboard inputs.
- Cleaned and standardized text and tabular data for reporting; created validation checks to improve data reliability.
- Optimized frontend and deployed the analytics dashboard to Vercel for stakeholder demos.

Business Development Intern / Data Analyst - PRODIGY AB

07/2024 - 09/2024

- Gathered and translated client requirements into product stories and prioritized tasks for the development team.
- Created website content, blog collateral, and campaign material to support lead generation and marketing efforts.
- Performed front-end testing and debugging to ensure consistent UX across browsers and devices.

TECHNICAL SKILLS

Analytics & BI	Tableau, Power BI, Pandas, NumPy, Matplotlib, Seaborn
Data & Engineering	ETL/SQL pipelines, data cleaning, data validation, reporting automation, Git, Linux, Docker
Tech Stack	React (Vite), Tailwind CSS, Node.js, Express, HTML/CSS/JS, Vercel, AWS, Azure
Programming	Python, SQL, Java, C/C++

KEY PROJECTS

BookMyFood (Prodigy AB)

- Developed and published the BookMyFood Android application on Google Play Store, achieving 500+ installs (as of Dec 2025), enabling users to browse and order home-cooked meals from local chefs.
- Implemented core marketplace features including community discovery, meal browsing, payment flow integration, and chef profile management.
- Integrated payment confirmations and digital receipts, enhanced user profiles, and optimized backend interactions to support scalable order journeys and user engagement.

Edutech Dashboard (Tutoratti.ai)

- Designed, built, and deployed a real-time analytics dashboard on Vercel to track student learning metrics and platform performance for data-driven insights.
- Integrated preprocessing and reporting pipelines into interactive views, supporting stakeholder review across 3+ KPIs.
- Conducted Tableau onboarding and training for internal teams, improving adoption and reducing manual reporting effort.

EDUCATION

B.Tech, Data Science (Expected 06/2026) - VIT Pune

CGPA: 8.58

ADDITIONAL HIGHLIGHTS

- President, Student Association (AiSA): Led a committee of 135 members, managed domain leads, and executed workshops, hackathons, and lectures while growing participation from 200 to 285.
- Head of Production Operations, TEDxVIIT: Managed logistics, speaker coordination, and AV production for a 500+ attendee event with a team of 20+ and a budget of INR 350,000.

ACHIEVEMENTS

- Won Viz-A-thon (Data Visualization Hackathon) 2023.
- Best FY team at the UBS Hackathon 2022.
